Our Purpose

OUR PURPOSE

Teach each standard with purpose, guide students toward deeper thinking, and know what to do next. Triplet Slide Decks bring classroom instruction, teacher guidance, and student practice together in one coordinated set, so what you teach, what your student sees, and what your student does stay in step.

This magazine lists every Triplet Slide Deck bundle we offer, shows real slides, a real teacher script page, and a real tracking sheet, and explains the daily routine, the prices, and how the decks arrive in your dashboard upon purchase.

THE IDEA

Three Tools, Working as One

Every Triplet deck includes three connected components. The slides, the script, and the student practice are built together, so the lesson you teach is the lesson your student practices.

1. Class slide decks

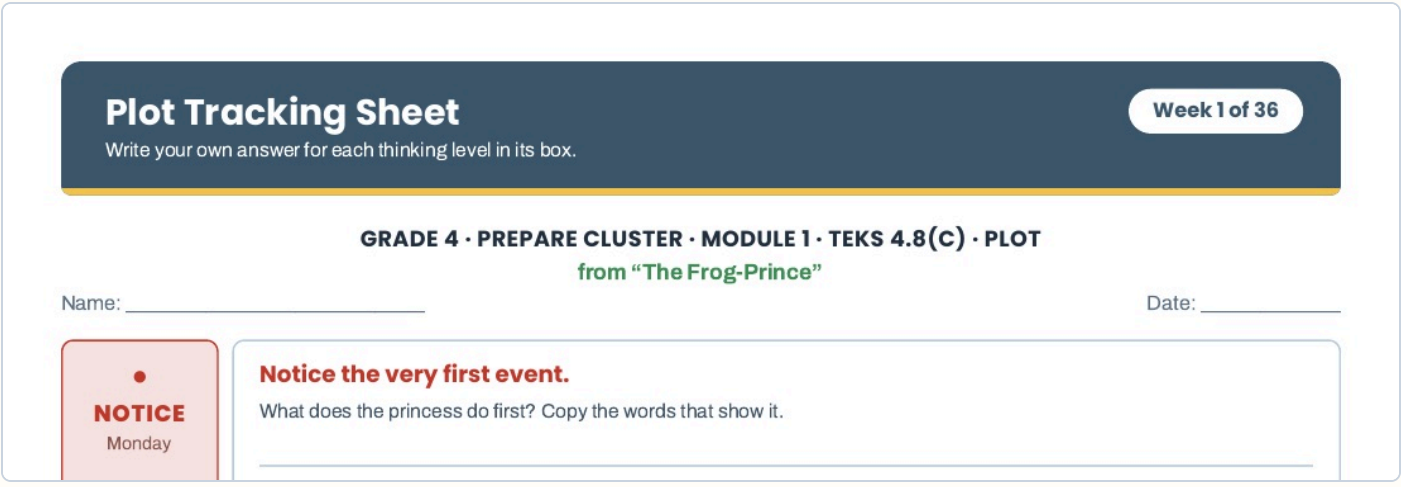

Each five day slide deck guides students through five thinking levels. The TEKS, purpose statement, essential question, assignments, and teaching tools establish a clear instructional focus as students build understanding, make their thinking visible, and move toward independent application and reflection. After the five thinking levels, the answer keys for the week of whole group work are revealed, so students can check and reflect on the responses recorded on their tracking sheets. Students then complete an independent activity and an assessment style question. The final slide gives the assessment answer key and explains why the correct answer is correct and why each other choice does not answer the question correctly.

2. Teacher script pages

Every classroom slide has a corresponding teacher page. The top half shows the same slide students see on the board. The bottom half places the script and instructional guidance directly beneath it. Bold, quoted sentences identify what to say, while italicized directions explain what to do. Supporting notes include possible student questions and suggested responses, common misconceptions, answers to essential questions, and next best step suggestions.

3. Student tracking sheets

Each student uses a two sided tracking sheet that follows the lesson sequence. The front captures whole group learning as students work through the five thinking levels. The back provides the independent activity and the assessment style question, including the correct answer choice and the other choices. Teachers gain a useful record of student work to help identify understanding and determine where additional support may be needed.

The tracking sheet your student keeps for the week. The script, slides, and sheet are built together. Real page from the Grade 4 Plot deck.

Where Triplet decks fit. Triplet Slide Decks support Tier 1 whole group instruction, introduction, review, small groups, and tutorials. Their focus on individual standards makes them useful both for building initial understanding and for providing additional practice when a particular TEKS needs more attention.

THE DAILY ROUTINE

A Week With a Triplet Deck

One deck, one TEKS focus, five days. Each day has one thinking job, and the week builds from first noticing to defending an answer with evidence.

NOTICE
Monday. Notice the very first step. Students look closely and copy the words that show it.

CHOOSE
Tuesday. Choose the best answer and name the trap in one wrong choice.

SHOW
Wednesday. Show the thinking with evidence from the text.

OWN
Thursday. Own the work independently, without the group carrying the answer.

DEFEND
Friday. Defend the answer and explain why the other choices do not work.

Monday in the Grade 4 Plot deck. The slide names the thinking job for the day, Notice, and states the exact TEKS wording. Real slide from the deck.

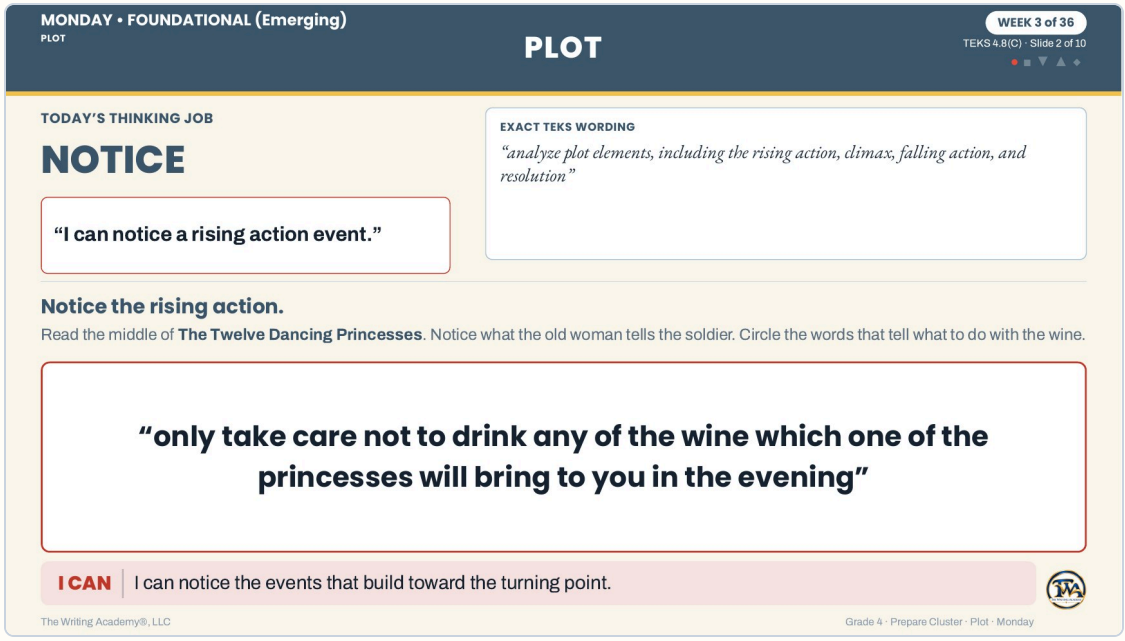

What happens each day

1. **Open the deck from your dashboard.** Put the day slide on the board and hand out the tracking sheet for the week.
2. **Teach from the script page.** The script page shows the student slide on top and your words below it, with timing, checks for understanding, and ways to raise the thinking.
3. **Students record on the tracking sheet.** Each thinking level has its own box, so the week of thinking stays in one place.
4. **Reveal and reflect.** When the week of whole group work is done, the answer keys are revealed. Students check their tracking sheets, complete the independent activity and assessment style question on the back, and review why the correct answer is correct.

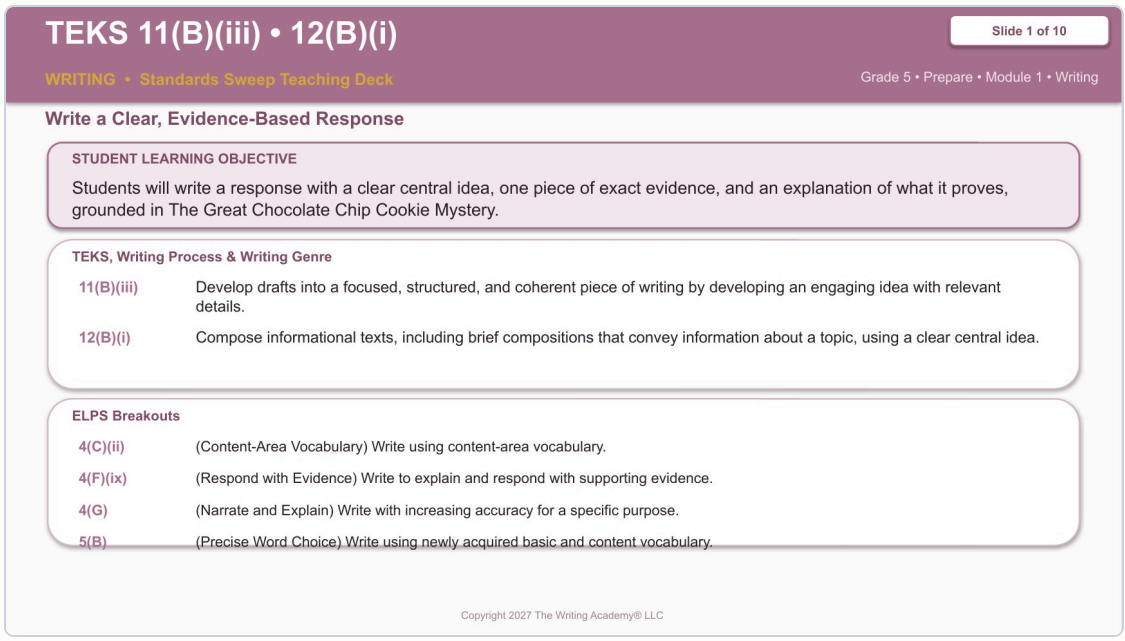

From the Grade 4 Plot deck, Week 1. The teacher script for slide 1 says, in quotes for you to say aloud: "This week we are learning about the rising action, the events that build up to the turning point of a story." The direction below it reads: Show the cover. Read the exact TEKS wording aloud, then read the What does this mean to me box in your own warm voice.

Three quick checks, and you are ready to order the right bundle the first time.

1. Your grade

Reading, ECR Writing, Editing, and Word Wisdom each offer one bundle for Grade 3, one for Grade 4, and one for Grade 5. Revising offers one bundle that covers Grades 3 to 5, with the Grade 3, Grade 4, and Grade 5 decks inside it. The full bundle grid is on page 13.

2. Your area

Choose the area you teach most, or the area where your student needs the next best step. Reading holds the most decks, with 94 decks across the three grades. Editing holds 85 decks, Word Wisdom holds 30, ECR Writing holds 13, and Revising holds 6. Pages 7 to 12 list every deck by TEKS and length, so you can check that the TEKS you teach is covered before you buy.

3. One teacher, one school year

Every bundle is $149 per teacher per school year, and every single deck license is for one teacher as well. Upon purchase, the decks are loaded into your Teacher Dashboard, and bundle decks open on TBASE through Open TBASE.

Included with every deck. The class slides, the teacher script page for each slide, and the student tracking sheets. Nothing else to buy, download, or assemble.

The teacher script page that matches the Monday NOTICE slide, Plot, Grade 4, Week 1. The student slide sits on top, and the script sits below it, ready in your hand. Real page from the deck.
